Summary

Senior Software Engineer building event-driven backends and LLM-powered production systems in C#/.NET and TypeScript on AWS. Currently run the pipelines behind 2,200+ automated publications/month at FirmPilot; previously built high-volume integration services processing 1M+ events/day at HCA Healthcare.

Experience

Senior Software Engineer Apr. 2025 – Present
FirmPilot *Remote*

- Automated content production end to end (generation, fact-checking, media, publishing), scaling output to 2,200+ publications/month across 4 channels without adding content staff.
- Built the async processing backbone for a multi-tenant AI marketing platform (.NET workers on SQS/SNS and ECS), adding dead-letter handling and Datadog alerting that cut failed jobs by over 50%.
- Rebuilt GitHub Actions CI/CD workflows, reducing deploy time from 15 to 7 minutes.
- Designed the GraphQL API and React/Next.js clients for the core product, holding p99 database latency under 25ms through DataLoader batching and targeted indexes.
- Introduced CQRS across 50 services (200+ commands and queries), scoping data access per service.
- Primary on-call for 45+ production incidents with 22-minute MTTR and zero timeout escalations.
- Mentored 3 engineers; daily code reviews across backend, frontend, and infrastructure.

Data Integration Engineer II (promoted from I) Sep. 2023 – Apr. 2025
HCA Healthcare *Nashville, TN*

- Owned production services for a HIPAA-regulated integration platform of 200+ .NET microservices processing 1M+ events/day over Kafka and IBM MQ, as one of 3 engineers.
- Built clinical data exchange to external EHR vendors (Epic, Cerner, Meditech) using FHIR, HL7, and IHE.
- Led migration of all 200+ legacy integration services to Apache NiFi on GCP (Terraform, Azure AD), adding Dynatrace alerting and automated failover that reduced production incidents.
- Mentored 2 engineers on Java, leading code reviews and architecture decisions for the Apache NiFi migration.

Full Stack Engineer May 2020 – Aug. 2023
Corolla Ice Delivery *Corolla, NC*

- Sole developer of the iOS/Android app (React Native) and backend that ran daily delivery operations, replacing Google Sheets dispatch.
- Built route optimization for scheduling, saving an average of 3 hours/day in delivery time.

Projects

Conductor | *.NET, Terraform, MassTransit* github.com/tcmarkfeld/Conductor

- CLI that generates least-privilege IAM policies and Terraform resources from MassTransit/SQS/SNS config for .NET teams deploying to AWS. Published on NuGet (500 downloads).

HL7Kit / **HL7Kit.Fhir** | *.NET, HL7, FHIR* github.com/tcmarkfeld/HL7Kit

- Strongly typed HL7 v2 parser with full segment coverage, dynamic delimiter handling, Z-segment support, and FHIR R4 conversion for .NET. Published on NuGet (800 downloads).

Technical Skills

Languages: C#, TypeScript/JavaScript, SQL, Python, Java
Backend & Data: .NET, Node.js, Entity Framework, GraphQL, PostgreSQL, SQL Server, Kafka
Cloud & Infra: AWS (ECS, SQS/SNS, RDS), Kubernetes, Terraform, Docker, Datadog, Dynatrace
Frontend: React, Next.js, React Native
AI: LLM pipelines, OpenAI/Anthropic/Gemini APIs, Claude Code, Codex, Cursor

Education

The University of Alabama Tuscaloosa, AL
M.S. Management Information Systems, GPA: 4.0/4.0 *Jan. 2021 – May 2023*
B.S. Management Information Systems, GPA: 3.94/4.0 *Sep. 2019 – May 2023*
